

Digital Object Identifiers (DOIs) for EOSDIS

Introduction

- The ESDIS project is in the process of gathering and registering Digital Object Identifiers (DOIs) for products supported by EOSDIS. Currently only data products supported by NASA are being registered.
- The ESDIS project uses EZID (<http://ezid.cdlib.org>) to register DOIs for EOSDIS earth data products. The DOIs assigned are listed by [Data Provider](#) here on the Earthdata Collaboration Environment
- This space on the Earthdata Wiki is meant to describe the ESDIS DOI process and provide guidance for registering and reserving DOIs.

ESDIS DOI Registration Process

ESDIS and DOIs

Find the DOI assignment process and DOI policies on the [ESDIS DOI Process](#) page

DOI Submission Process

Visit the [DOI Submission Process](#) page to access the DOI submission form and for an explanation of the various submission types

DOI Landing Page

Guidelines and recommendations on landing page format and content can be found on the [DOI Landing Page](#)

DOI General Information

DOI Background Information

Visit [DOI Background Information](#) to learn more about what a DOI is and how it is used.

DOI Documents

Documentation related to DOIs is available at [DOI Documents](#)

Contact Information

To submit DOIs for registration for EOSDIS supported projects, contact Nate James (nathan.l.james@nasa.gov) and Lalit Wanchoo (lalit.wanchoo-1@nasa.gov).

ESDIS DOI Status

and Listing

Visit the [ESDIS DOIs Status and Listing](#) page to view DOIs registered and reserved by ESDIS by campaign/missions; as well as current metrics.
